Secretary,
Ministry of Rural Development

FOREWORD

Rural development is the cornerstone of our nation's progress, as it directly impacts the lives of millions of citizens living in villages across India. The Ministry of Rural Development has been steadfast in its commitment to fostering sustainable growth and improving the quality of life for rural communities.

Recognizing the critical role of accurate data in shaping development strategies, the first volume of this publication "Rural India: A Cross-Sectoral Data Compendium 2024" is being released to bring together **the latest available rural data from diverse ministries and departments**, thematically organized across sectors such as **agriculture, rural finance, employment, infrastructure, education, health, and basic services**.

The objective of this compilation is to provide a **holistic and data-rich snapshot of rural India**, bridging information gaps and enabling integrated analysis. Further, India's rural landscape is undergoing dynamic transformation, driven by a wide array of developmental initiatives and the growing integration of technology, infrastructure, and governance reforms. In this context, **timely, reliable, and thematically integrated rural data** becomes a cornerstone for informed decision-making, effective policy formulation, and meaningful public discourse.

I hope that this compilation will serve as a valuable resource for policymakers, implementing agencies, and all stakeholders involved in the mission of transforming rural India.

I commend the team for this thoughtful and timely initiative, and I encourage readers to offer their valuable feedback to enrich future editions and ensure that this publication remains a dynamic and responsive resource in the service of rural India.

PREFACE

The Ministry of Rural Development has been relentless in its pursuit of transforming rural India through focused, impactful, and inclusive development programs. Our mission is to build a self-reliant rural India, where every citizen has access to opportunities, security, and a better quality of life. As we continue to implement a range of Centrally Sponsored Schemes aimed at eradicating poverty, creating sustainable livelihoods, and developing essential infrastructure, we recognize that no two regions in our country are alike; each presents unique challenges and opportunities.

The past years have been pivotal in our journey towards rural transformation. With the implementation of flagship schemes like the Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS), Pradhan Mantri Awaas Yojana-Gramin (PMAY-G), Pradhan Mantri Gram Sadak Yojana (PMGSY), Deendayal Antyodaya Yojana - National Rural Livelihood Mission (DAY-NRLM), Deen Dayal Upadhyaya - Grameen Kaushalya Yojana (DDU-GKY), National Social Assistance Programme (NSAP), and Sansad Adarsh Gram Yojana (SAGY), the Ministry has addressed key areas of employment, housing, infrastructure, livelihood, and social security in rural regions. These programs have been implemented in collaboration with State Governments, whose role has been instrumental in catering to the specific needs of their regions.

In an era marked by rapid transformation through technological advancement, infrastructure growth, and policy innovation, accurate and timely data is essential for crafting effective strategies and tracking progress. The “Rural India: A Cross-Sectoral Data Compendium 2024”, the first volume in a proposed series, brings together the latest rural data from various ministries and departments, to provide a cross-sectoral view of the rural landscape. Covering themes such as agriculture, financial inclusion, employment, infrastructure, health, education, and basic amenities, the volume offers an updated and coherent snapshot of rural India.

I express my gratitude to Secretary, Department of Rural Development for his guidance in preparation of the report. I would like to express my heartfelt appreciation to the Statistics Division lead by Ms. Pinky Sawariya and her dedicated team member for their meticulous and persistent efforts. I also extend my sincere thanks to the Project Divisional heads for their valuable inputs and support at various stages of preparation of this report.

I hope that this report will prove useful for policymakers, planners, administrators, researchers and other stakeholders and also inspire further action and collaboration towards realizing our shared vision of a vibrant and inclusive rural India. I welcome suggestions and feedback from all stakeholders for improvement in this publication.

The State of Telangana was formed in 2014, splitting from the state of Andhra Pradesh. As such, the state existed as a separate sampling unit in 2015-16 and 2019-21, but this was not the case in 2005-06.

The 2005-06 estimates for Jammu & Kashmir include both Jammu & Kashmir and Ladakh. Thus, separate estimates for Ladakh don't exist in 2005-06. However, separate estimates for Ladakh and Jammu & Kashmir exist for 2015-16 and 2019-21.

Union Territories: Andaman & Nicobar, Dadra & Nagar Haveli, Daman & Diu, Lakshadweep, and Puducherry were not sampled in NFHS 2005-06. In NFHS 3 (2005-06), the sampling unit that formed the state of Chandigarh was part of the two neighboring states of Punjab and Haryana. While in 2015-16 and 2019-21, Chandigarh had separate estimates.

The estimates are based on the India and State/ UTs population projections by MoHFW.

Uttar Pradesh, Bihar, Madhya Pradesh and Rajasthan record largest decline in number of **MPI poor** during last 9 years

Steep decline in **Poverty Headcount Ratio** during the last 9 years

24.82 crore individuals estimated to have escaped multidimensional poverty during last 9 years

India likely achieved **SDG Target 1.2** (reducing multi-dimensional poverty by at least half) much ahead of 2030

12 indicators show significant signs of improvement

DRINKING WATER

A photograph of a person's hands holding a metal cup under a public water tap. Water is pouring from the tap into the cup. The image is overlaid with a blue tint and a digital data visualization graphic at the bottom, consisting of many vertical lines of varying heights and colors (blue, green, yellow) with small dots at the top, resembling a data stream or network visualization.
